

通讯与网络用塑料光缆

Plastic optical fiber for communication and network

塑料光纤是一种全新的数据通信传输媒介其应用技术中已经具有产业化产品,如:交换机、室内路由器、语音网关、PCI卡、USB适配器、光电介质转换器、墙面信息盒、有源中继器、无源耦合器、光电配线设备以及嵌入塑料光纤收发连接一体模块的网络监控、门禁等系统设备,构成了塑料光纤系统产品群。

Plastic optical fiber is a brand-new data communication transmission medium. Its application technology already has industrialized products, such as: switches, indoor routers, voice gateways, PCI cards, USB adapters, optical media converters, wall information boxes, active Relays, passive couplers, optoelectronic wiring equipment, and network monitoring, access control and other system equipment embedded in the plastic fiber transceiver connection module form the plastic optical fiber system product group.

产品特点 | Features

裸光纤外面增加PE护套,有效保护裸光纤不受损伤,防止外界光线对光纤内光线的干扰。

1、增加外护套,有效增加光缆的机械性能、耐候性能和耐腐蚀性能,延长光纤使用寿命

2、光纤柔软,可随意弯折,延伸到狭小空间,将光线导入。

3、环保、无毒、无金属,可回收

The jacket is added outside of the single-core bare fiber effectively protect the bare fiber from external damage and avoid the influence of the external environment on the information transmitted by the fiber.

1. Adding jacket to effectively increase the mechanical properties, weather resistance and corrosion resistance of the optical cable, and extend the service life of the optical fiber.

2, the fiber is soft, can be bent at will, extend to a small space, the light is introduced.

3, environmental protection, non-toxic, no metal, can be recycled.
